

Barrel Clamps

Barrel Clamp - A Barrel Clamp is actually a hydraulic or mechanical accessory for a lift truck. It can be utilized in order to compress the object you need to move using the lift truck and is usually utilized for handling paper rolls, barrels, and kegs. Some designs of barrel clamp attachments even have a revolving function. Like for example, the rotate function allows the person operating the forklift to be able to insert a vertically stored paper into the horizontal intake of a printing press.
