

Aerial Work Platforms

Aerial Work Platform - There are numerous attachments meant for forklifts which could be used to help expand the functionality of your lift truck and allow you to carry things, handle materials with less effort or to accomplish clean-up jobs.

Several of the accessories are specifically designed so as to fit on the forks themselves. Blade extensions for example, are utilized whenever you require a lot more blade length, that increases lifting capability. Blade extensions come in lengths varying from 48-120 inches. Triangular or rounded accessories are one more type utilized if moving rolled material to be able to make certain it does not roll off of the typical flat blades.

Lifting accessories can be pivoting and telescoping crane accessories. They come in many kinds. These accessories are often designed for transporting lumber, metal bars, poles or any kind of bulky objects. Additional accessories such as various kinds of hooks and hook plates are accessible in order to pick up stuff using a sling or chain. Magnetic lifters and slab lifters are other stuff that could be used with hook accessories. Slab lifters are specialized accessories which are utilized for picking up different materials which are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools which attach to your lift truck to be able to make transferring rolls of carpet much easier. The attachment hooks onto the lift truck's blades and has a pole that goes through the center of the carpet roll.

There are many different types of forklift accessories that could be meant for facility maintenance such as snow blades. These forks connect to front end loaders and could transport materials such as dirt, soil and snow. Other common cleanup accessories include standard sweepers and magnetic sweepers. Standard sweepers consist of a broom that the lift truck blades hook onto for sweeping large spaces like for example factory floors, parking lots and warehouse. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in areas where there is lots of metal fragments such as on shop floors for example. Sweepers have widths as much as sixty inches and this surface area makes clean up quick and effortless.

Material spreaders are other attachments utilized on lift trucks. These spreaders are helpful for a variety of applications such as spreading pellets, fertilizers, insecticides, seeds, ice melt and rock salt.

Another optional lifting attachment are work platforms. These could be utilized by a lot of different companies day by day. Platforms may range in size from 36" x 36" to up to 60" x 60". Several models may be existing and are capable of folding up and storing into a smaller place. Work platforms are designed to raise personnel up to an overhead location utilizing the lift truck. Larger platform models have added space for workers so as to carry tools and other essential stuff for the task. Usually work platforms are constructed of steel or ploy material.
